

# International T&E Partnerships: Working Together to Serve the Needs of Our Customers

**John A. Wiles, Ph.D.**

**Associate Director, Operational Test & Evaluation  
Office of the Secretary of Defense**

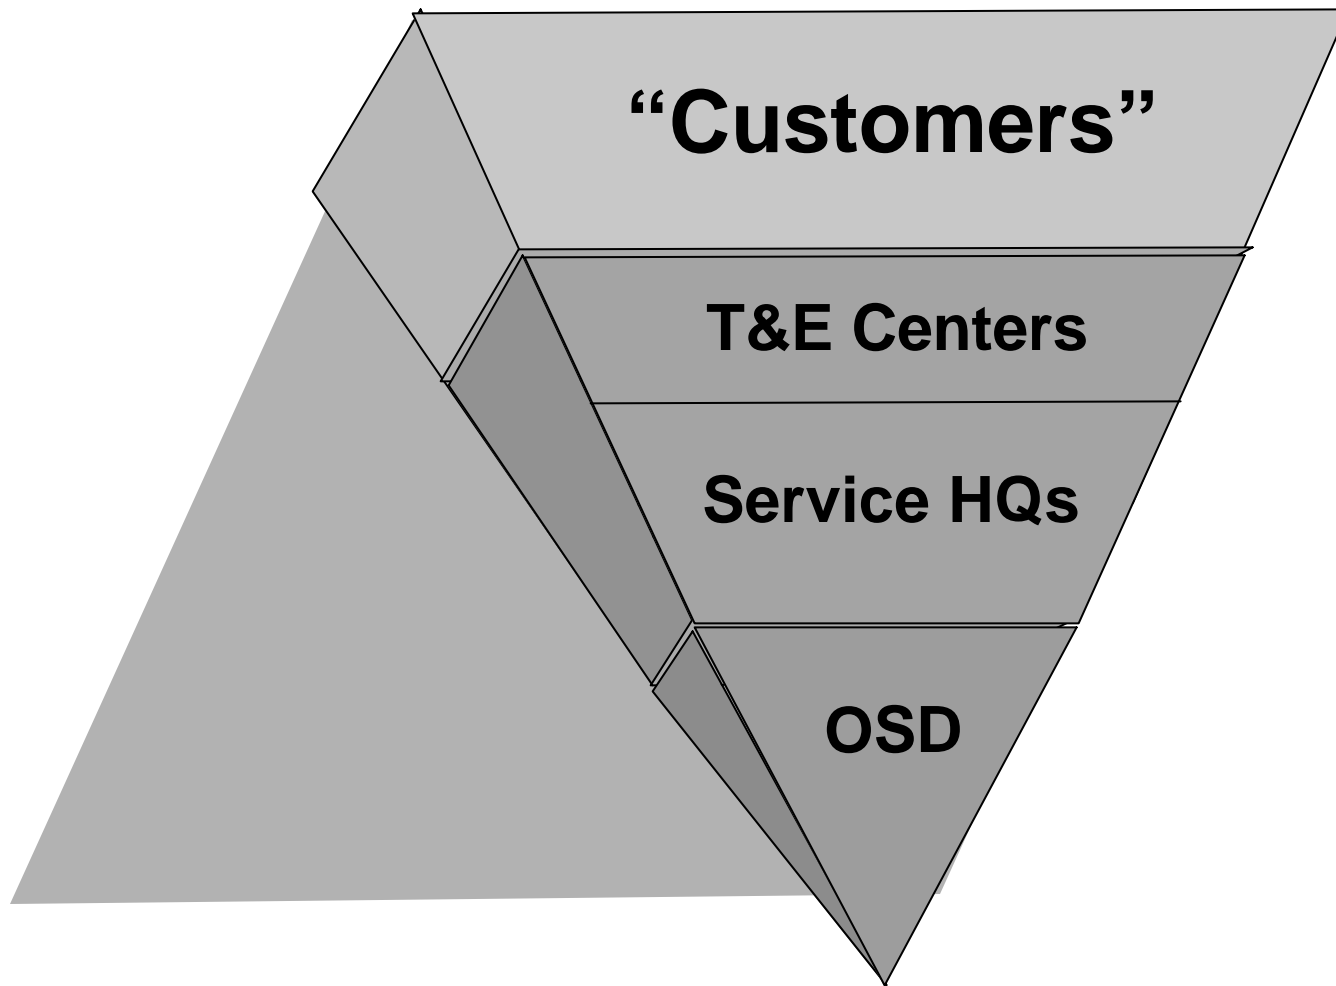

# The Way It Seems To Be

# The Way It Should Be

# Defense Science Board

- The focus of T&E should be on optimizing support to the acquisition process, not on minimizing (or even 'optimizing') T&E capacity.
- Assessment of our investment strategy in T&E capability and our anticipated ability to properly test and evaluate future military systems, considering all national and international test and evaluation capabilities

# International Tool for Facilitating Cooperation?

- U.S. Joint Program Office (JPO) for T&E has developed a web-based information tool:  
**“Facility & Capability Information for Test & Training” (FACITT)**
- Enables a user to to locate DoD range facility capability information
- DoD working to provide international access to this capability

# Challenges

- Broaden Scope of Partnerships
- Public-Private Partnerships
- Privatizing Government T&E Activities
  - Government-to-Government Agreements
  - Versus Contractual Agreements
